Free Photo Noise Reduction is a free, easy-to-use program that allows you to reduce the grainy and colored noise effect in pictures, no matter whether it is a photo captured by a smartphone or a digital camera. As the noise is inherent to all digital cameras, Free Photo Noise Reduction enables you to correct the grainy effect that renders the image. There may be several reasons why a photo is noisier than others: it was captured under low light conditions or through a damaged lens. You may also adjust the contrast and saturation, as well as change color tones. By default, the image is displayed in medium-size windows for viewing and can be saved with a different image title.
