+Play music on YouTube with YouTube Scrobbler +Auto-adds video by music +Easy playlist creation +No need for an account +Works with all the YouTube links +You can play music on any mobile +Customize the heart-shaped button on video +Easily add to favorites What's in the box? YouTube Scrobbler extension User manual What does it take to install? 1. Download YouTube Scrobbler and unzip the file 2. Double-click the YouTube Scrobbler icon and run it 3. Connect to your WiFi network 4. Click the "Install" button, and follow the instructions 5. Open your browser, and visit YouTube YouTube Scrobbler is an extension for your browser that allows you to play music while you are surfing on the YouTube website. It connects to your mobile via the "Music" menu, which is also found in the footer of the website. If the player is not automatically activated, you will find the heart-shaped button in the lower left corner of the video. When you hover over it, it will show the favorite videos of your last.fm account. As Scrobbler collects music that is played through YouTube, you can also select and remove all the videos that it does not like. These videos are also saved to your favorite videos. The location and video format will be displayed. To remove a video from your Scrobbler, please click on the heart-shaped button in the video, and then click on the "Remove from favorites" link. Clicking this again deletes the video from your Scrobbler. As YouTube's search engine is YouTube.com, the extension can also be used in Google search engines, such as GOOGLE.COM. Like it? #### What's New In?

Most popular music player: A video player for your favorite songs. Your browser does not support the video tag. Your browser does not support the video tag. What is it? Scrobber is a video player for your music. It is a Firefox extension that supports almost every music website and a video streaming website. Once you have it in your browser, you just need to play a song. The extension will then automatically add that song to your playlist after it has played for four minutes or when the tune ends. If you do not want to wait for this to happen, you can, of course, add it manually with a single click. If you want to select the favorite songs for the last.fm website library, you can do that with the new heart-shaped button added directly in the YouTube player. But what if it adds videos that are not related to music? You do not need to worry about that. When you are playing a video on YouTube, Scrobber will only process those that fall under the Music or Entertainment category. So if you are watching something comedy-related, for example, it will simply disregard that. Why would I use this instead of YouTube's own playlists? Well, it depends. If you use other streaming services for music listening, last.fm can help you centralize all your favorite content on its website and offer you statistics and recommendations based on them. And when it comes to the YouTube content, Scrobber will help you with tracking it. But, if you are only using YouTube for your music, then everything will already be stored on their servers, so you do not actually need this extension. What is it? Scrobber is a video player for your music. It is a Firefox extension that supports almost every music website and a video streaming website. SourceWhat does it do? When you play a song, Scrobber will automatically add it to your playlist and keep track of it. If you want to select it for the last.fm website library, just click on the heart icon next to the song title. You can also manually add a song to your playlist just by clicking on the "Add to play list" button. Scrobber will automatically add a video that is related to music to your playlist as well. Why would I use this instead of YouTube's own playlists? You are probably using Youtube to watch videos and listen to music. Well, Scrobber is a web browser extension that supports both.
