Anvi Ad Blocker Ultimate

Advanced users may opt for the professional version of the utility, which offers support for detailed statistics about the number of scanned items, found threats, and blocked URLs, whitelists and blacklists, logs, and proxy parameters. You have rated this Share this product Reviews « Prev 1 2 3 Next » Overall rating Trustworthiness Ease of use Value for money Anvi Ad Blocker is a lightweight software application that features ad-blocking capabilities for helping you improve your browsing experience. Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you to need to block annoying ads on the breeze, without having to go through installation steps. Anvi Ad Blocker sports a clean and straightforward layout that allows users to set up the dedicated parameters with minimum effort. The tool is able to block pop-up and Flash ads, banners, malicious websites that may compromise your system security, as well as phishing URLs. The ad-blocking mode can be activated with just one click, and you can also restore the system to its original settings and view the total number of scanned items. Another notable characteristic of this tool is represented by the possibility to create a custom list with websites to be blocked. Additionally, you can import the list with URLs from a file and export it to a plain text file. During our testing we have noticed that Anvi Ad Blocker carries out a task very quickly and without errors throughout the entire process. It is friendly with system resources, so the overall performance of the computer is not hampered. As a conclusion, Anvi Ad Blocker seems to be the right choice in case you are looking for an easy-to-use ad-blocking program that comes bundled with limited features. Advanced users may opt for the professional version of the utility, which offers support for detailed statistics about the number of scanned items, found threats, and blocked URLs, whitelists and blacklists, logs, and proxy parameters. You have rated this 5 out of 5 Good program by Paul If you want a program that blocks only the popups of sites. Then this is it. If you want a more flexible program then go for a different one. An
