Below we will review the features that are common to most versions of Photoshop. We will also provide three different tutorials designed to introduce readers to Photoshop's various features. There is also a companion chapter on how to use the tutorial. The Future: Adobe is always making new changes to the Adobe Photoshop product line. It is important to keep an eye on what will be added or changed in the next version of Photoshop in order to be prepared. Basic Photoshop Modes Two different modes are available. The default mode is RGB. This color mode keeps the colors intact and shows the shades of all the colors. In the next mode you can alter the shades of the colors in the image. The colors are no longer exact. An RGB image will have color pairs that are extreme, right on the edge of red or blue. With the Saturation mode, you will be able to make colors appear softer and the colors will be more subtle. However, the colors will still be the same as what you're seeing on your monitor. Layers There are layers in Photoshop. They are basically pages that you can place pieces of the image on. You can overlay them on top of each other to create images that are much bigger than the image you started with. You can take different parts of the image and have them in different layers. To create and manipulate images using layers, you will need to create a new image with a blank layer. Once you have made your edits to the image you can move that image to a new layer and apply different changes to the image. You can turn the layers off and on by going to Layer > New Layer. Photoshop Elements Editing In the toolbar of Photoshop elements, there are a set of basic editing tools that you can use to resize, reposition, and rotate your images. Underneath the Edit menu, there is also a small toolbar where you can open your image and perform other basic image adjustments. You can bring up the keyboard to scroll through the different menus. The menus will display with the images you have open. The items in the menus change depending on what you have open. To change the view, you can press the right or left arrow keys. You can pan through the image as you scroll with the up or down keys. The cursor will move with the mouse and the toolbar will change with the page you are on. Photoshop Elements also has

from my own understanding, my thoughts and feelings. They're not anything I've ever gotten to truly understand. I think about your probably entitled whiny crybaby fans. I've seen you talk about how you admire them and whatnot but I've never seen you appreciate their loyalty to a band. What about it strikes you so special? You may say it's their devotion and fan loyalty but do you really understand it? No, I don't really understand it. I mean, I'm sure I could if I was that way inclined, but I'm not. I'm just not. "You may say it's their devotion and fan loyalty but do you really understand it?" I'm not that way inclined, but I do admire that they like the band that much. I know a lot of people won't say that, but it's very flattering. I think you're a lucky woman to be able to make whatever music you want to. Do you ever get bored to the point where it makes you want to quit? Honestly, no. You know, I think I'm like Forrest Gump when it comes to music. He was never bored. Looking back, do you feel like you've grown from your teenage years? Absolutely, but that's kind of been the common theme in my life ever since I was a little girl. I don't think anything about myself has ever really changed. I was always self-conscious and insecure and I think that's maybe the thing I've always been most ashamed of. A lot of people have that and it's the same for a lot of people all over the world. There's a lot of introspection that goes into anything you do in your life. You think about all the things that you can do to improve yourself. I also think there are things in life that you can't do anything about, whether it be your parents, your family, your situation, or whatever it is. It doesn't always work out the way that you want it to, but I think that's what being a human is about, as much as it's about sitting down and having some dinner and going to school. When it's all
