This Week in Schmooze: October 23, 2011 Thursday, October 26, 2011 The opening day of the National Meeting of the American Chemical Society comes with a 20% discount on registration. The attendance of some 25,000 chemists and chemical engineering students is sure to be a breeze. In other American Chemical Society news, this week's sciOP newsletter (reports that preprints of 30 chemistry papers have been selected for peer review by the journal ACS Chemical Neuroscience. And that another team of researchers have developed a new chemical technique that could help with the growing demand for stable isotopes for biofuels, gas tanks and tissue imaging. Seeking to improve, enhance, expand and further develop our nation's abilities to understand, use and dispose of hazardous chemicals is the reason why the US Chemical Safety Board (CSB) released today an update of the Chemical Safety Improvement Act (HSIA). With a new set of hazardous chemical management standards that help protect the public, the CSB has moved to a new era of chemical safety and regulatory science. A two-year old company, based in Riga, Latvia, is partnering with a California based startup and two prominent American companies to usher in new chemical processes that could add millions of dollars to the economy. The late Chris Linder, an early entrepreneur in the field of direct liquid fuel synthesis, worked to solve some of the biggest problems facing the burgeoning alternative fuels and chemicals industry. The idea behind these challenges was the use of fossil resources to produce renewable chemicals. The Bill and Melinda Gates Foundation and the world-renowned Harvard T.H. Chan School of Public Health (Chan-SPH) have announced a \$50 million partnership with the National University of Singapore (NUS) to tackle infectious diseases of poverty and other global health problems. With its unique science education programs, the school has proved that it can offer access to university science education to people from all over the world, regardless of economic status. It has already brought together students from 65 countries. The Israeli firm
