## Zoicide Full Product Key Free Download

A top down sidescrolling shooter where the character movement system allows for a true tactical experience. Every movement is unique and you can dodge enemy shots with nothing but a smooth run. X-Rotation: The original gameplay was based on a top down perspective with diagonal movement, a simple twist has now been added to the game, the game now rotates, meaning that the perspective is rotated 90° each round, giving you a fresh challenge each time you play. Hero and Dark Hero: We added two different game types, Dark Hero and Hero, the Dark Hero is a challenge mode based on skills. You have to protect a power cube that protects your world from dark energy. Protect your power cube and you can use it to re-buy the game, win every round, every time you are killed. VS Modes: We added two Versus modes, one is local (co-op) and one is online. This allows you to play with your friends online with the local versus mode. Co-op mode allows 2, 3, 4 and 5 players to play together with the same character and the same game. Also the A.I is programmed to be kind to you. Therefore, the A.I will, even in high level modes, never kill you. Friendly vs. Enemy: The game has friendly vs. enemy mode, you can play with your friends online against the A.I. and versus the human. This allows you to have friendly matches online with the same character. Boss Mode: Boss Mode has a unique challenge and the same rules apply as standard game mode, but the bosses are stronger and can do more damage. Power Cubes: We have added Power Cubes into the game, you need to collect them in different rounds and once you collected the power cube that fits your overall needs, you will be able to re-buy the game and win every round. You will need to earn the power cube you want before you can use it. If you have the Power Cubes and you run out of game, you will be out of the game, so keep an eye out for them. Graphics: The graphics are the most important aspect of a game and we would like to make them as the best as possible. This is why we use a 3D modeler. To make the player feel like they are not just watching a video, but they are there in the game. Sound: The sound is what we all remember the best of all games. We want
