All the other statistics are also interesting, like how many times Hp Turners Vcm Suite Keygen Download was added to the new and making it to the first 60 spots of rankings. I Hope that our website can be useful for you and bring a lot of useful information for you everyday.Q: Schedule Tasks on Android I'm aware of the following question which asks the same thing as mine, but the answer isn't very clear. I'm looking for a way to get a function to run periodically (say every 10 minutes), regardless of what the user is doing. For example, if the user is listening to music, it doesn't matter; if the user's in the middle of a broadcast, it doesn't matter. Thanks! A: Use AlarmManager (docs). Use it like this: Intent alarmIntent = new Intent(getApplicationContext(), AlarmReceiver.class); PendingIntent sender = PendingIntent.getBroadcast(getApplicationContext(), 1, alarmIntent, 0); AlarmManager alarm = (AlarmManager)getSystemService(Context.ALARM_SERVICE); alarm.setRepeating(AlarmManager.RTC_WAKEUP, 1000 * 10, 10 * 1000 * 10, sender); And then define a class that extends Broadcast
